Colourcoil Industries Sdn Bhd represents one of the leading coil coating specialists in the Asia Pacific region. With the latest state-of-the-art infra-red curing technology and proprietary high quality, lead-free paint coatings, Colourcoil Industries is able to produce world class pre-painted steel products with brilliant finishes and exceptional durability properties. Superior levels of product quality and customer service are accomplished through the involvement and dedication of all employees, review of quality objectives and continual enhancements to quality system effectiveness.

INFRA-RED CURING TECHNOLOGY

Colourcoil Industries is the first colour coating line in the Asia Pacific region to feature the state-of-the-art

infra-red curing technology. The key word with such technology is control. By its very nature, it provides control for what is virtually impossible to attain with most other curing processes. Infra-red curing gives brilliant smooth finishes that are virtually blemish-free with consistent paint thickness across the metal strip.

COLOURCOIL® HIGH PERFORMANCE PRE-PAINTED STEEL

Recognizing the metal roofing and wall cladding industry as one of the major consumers of pre-painted steel material, Colourcoil Industries has developed special high performance pre-painted steel products that are coated with selected lead-free, high quality, inorganic/ceramic pigments together with custom formulated

binders. When cured using infra-red technology, they exhibit outstanding colour retention and exceptional durability properties. They come in a wide range of creative and exciting colours from solid to pearlescent finish that will suit any roof or wall cladding design. To ensure superior resistance to corrosion, only genuine 55% aluminum-zinc coated steel substrates are used.

Colourcoil® high performance pre-painted steel comes with true warranties of up to 20 years against colour fading, chalking and delamination and 25 years against corrosion. They are available in:

COLOURCOIL® ELITE Series™

A super durable ceramic polyester coating system that comes with a 10 year warranty against fading, chalking and delamination with a 25 year warranty against corrosion. Available in a wide range of colours, this high performance pre-painted steel is suited for industrial, commercial and residential applications.

COLOURCOIL® PVF2 Series™

A custom formulated fluorocarbon paint system consisting of full strength 70% Kynar 500/Hylar 5000, offering the ultimate performance in colour and gloss retention providing lasting outdoor

performance. This high performance pre-painted steel comes with a 20-year warranty against fading, chalking and delamination and a 25-year warranty against corrosion. This high performance pre-painted steel is suited for both prestigious commercial and residential applications.

COLOURCOIL® METALLIC PVF2 Series™

A pearlescent metallic finish consisting of full strength 70% Kynar 500/Hylar 5000 fluoropolymer resin and mica. Providing for lasting outdoor performance, this high performance pre-painted steel finish stunningly changes colour depending on the lighting condition and viewing angle. Metallic PVF2 Series comes with a 20 year warranty against fading, chalking and delamination with a 25 year warranty against corrosion.

By specifying metal roofs and wall cladding manufactured from Colourcoil® high performance pre-painted steel, you are assured of a wise investment that will add value to your property.

The SECRET to long-lasting beautiful metal roofs with no worries!

The secret to long-lasting beautiful metal roofs starts with Colourcoil® high performance pre-painted steel.

By combining special high quality anti-staining and anti-fading paint formulations with the latest state-of-the-art infra-red curing technology, Colourcoil Industries can offer to the discerning client, world class pre-painted steel products for the downstream manufacturing of high quality metal roofing and wall cladding.

Colourcoil® high performance pre-painted steel finishes are excellent and exhibit outstanding colour retention and long term durability properties. They are available in a wide range of colours and come with true warranties of up to 20 years against fading, chalking and corrosion. By specifying metal roofs manufactured from Colourcoil® high performance pre-painted steel, you are assured of a wise investment that will add value to your home.
